EDUCATION

Pennsylvania State University | University Park, PA **Expected May 2029**
B.S. Mechanical Engineering GPA: 3.21
Relevant Coursework: Thermodynamics, Engineering Design, Calculus I-III, Physics I, Statics

PROJECTS

5-DOF Desktop Robotic Arm | Personal Project **September 2026 – November 2026**

- Designed a 5-DOF servo-driven arm with 7 custom parts and 6 servos, and checked its range of motion with a CAD motion study
- Applied DFM: kept all parts under 161 mm to fit the print bed, standardized the servo mount across 5 joints, and added truss cutouts to cut weight
- Created 7 dimensioned drawings, 3D printed all parts in PLA, assembled them with M2 screws, and programmed 6-servo motion control in Python

Mobile Surveillance Robot | Personal Project **June 2026 – Present**

- Designed and modeled compact two wheeled surveillance robot using Fusion360 with integrated camera, motors and electronics
- Produced CAD assembly while considering DFM and mechanical integration
- Created detailed sketches and iterative concept drawings to refine chassis layout, wheel placement, and camera mounting before CAD modeling

Assistive Mobility System | Pennsylvania State University **July 2025 – August 2025**

- Modeled assistive mobility device in Fusion360 to improve accessibility for individuals suffering from arthritis
- Sketched multiple concept iterations to explore grip, frame, and stability options before finalizing CAD design
- Presented research and design at the Pennsylvania State University First Years Engineering Design Conference to a panel of faculty and peers

WORK EXPERIENCE

ADP | Center Valley, PA **June 2026 – August 2026**
Small Business Sales Intern

- Managed a high-throughput workflow (**75+ calls daily**) while maintaining accurate documentation, demonstrating process discipline under volume
- Applied a structured, metrics-driven approach to outreach; tracking call volume, conversion rates, and pipeline data in Salesforce to identify what worked
- Developed working technical knowledge of ADP's payroll, HR, and benefits administration products to accurately match solutions to small business client needs

ACTIVITIES & LEADERSHIP

Consultant Training Program | Pennsylvania State University **January 2025 – April 2025**
Consultant Trainee

- Trained in case analysis and structured problem-solving frameworks used in business consulting
- Applied those methods to mock consulting projects, developing recommendations through team-based analysis

SKILLS & CERTIFICATES

CAD: Autodesk Fusion 360, SolidWorks
Certificates: MATLAB Onramp (MathWorks 2026), Machine Learning Onramp (MathWorks 2026)
Technical Software: Microsoft Office, Google Workspace, Salesforce
